REPAIR FORM

LETS GET STARTED

The repair and rebuild process begins after we receive your unit and perform our inspection and evaluation. Once the inspection is completed, PDS will prepare a Repair Quote, review it with you and ask for your “approval to proceed”. If you decide not to have us repair your spindle, we will box it up and return it to you at your expense. In the event of a warranty spindle repair, please call the service department @ 704-922-1206 to receive a Return Material Authorization number (RMA#).

To begin the spindle or saw arbor repair process, complete the form on this page and ship to PDS with spindle.

- Call 704-922-1206 and press “4” to let us know your unit is on the way
- If sending special tooling or fixtures, please advise

Ship to address for US and German locations:

32584 Lohne, Germany

Visit www.spindlerepair.com/submit-repair/ to complete this form online.

If you need an **emergency repair**, it is imperative you call us before you ship your unit so we can evaluate our repair schedule. PDS will confirm your Emergency Repair Service request after the spindle has been received and inspected by PDS.

Emergency repair service requires allocation of technicians and resources in advance. Spindles sent in for emergency repair are placed ahead of normal repairs upon receipt. Expedite fees will apply regardless of unforeseen circumstances preventing a scheduled delivery.
